## Colours Chart

The colours shown here are approximate and may differ from their original appearance once applied.

This colour card is composed of two groups (Group 1 and Group 2), consisting of 32 and 18 RAL colours respectively. Their prices are indicated in this price list as Group 1 Colours and Group 2 Colours.

The colours belonging to Group 2 have a slightly higher price (already included in the price list); this is due to the increased cost of the pigments used in their manufacture.

The colours outside of both classifications are defined as GROUP 3. These colours are subject to assessment by Management according to the following factors: quantity, manufacturing availability, pigment cost and delivery time.

As noted, availability of some colours is limited for some products.

**Colours and/or quantities which are not specified in the product description are not available. Please check.**
